

Call for proposals

„Svalbard“

**for monitoring and identification of local air pollution caused
by local heating**

Number of the Call: SGS-2

The Programme „Environment, Ecosystems and Climate Change“
financed from Norway Grants 2014–2021

The State Environmental Fund of the Czech Republic

TABLE OF CONTENTS

- 1. Who is an eligible project promoter and who can be a project partner?..... 2**
- 2. What projects and activities are supported by the Call? 3**
 - 2.1. *Types of supported projects and activities*..... 3
 - 2.2. *Eligible project expenditures* 4
 - 2.2.1. *Direct costs* 5
 - 2.2.2. *Indirect costs* 7
 - 2.2.3. *Other information for eligible costs*..... 7
 - 2.2.4. *Non-eligible expenditures* 9
 - 2.3. *Reimbursement of project partner expenses*..... 9
- 3. What outcomes and outputs shall the project contribute to and what indicators shall be reported? 10**
- 4. What is the amount of project grants? 11**
- 5. How is the application administred?..... 12**
 - 5.1. *The submission of the application* 12
 - 5.2. *Evaluation of the application* 12
 - 5.3. *Project selection and approval process*..... 14
 - 5.4. *Project contract* 15
 - 5.5. *Project amendment request*..... 15
- 6. What is the implementation period of approved projects? 16**
 - 6.1. *Procurement within the project* 16
 - 6.2. *Monitoring and implementation of the project*..... 16
 - 6.3. *Project financing scheme*..... 17
 - 6.4. *On-site control of the project implementation* 19
 - 6.5. *Irregularities in project implementation* 19
- 7. How to properly promote and inform about awarded project? 20**
- 8. Other elements or facts related to supported projects 21**
 - 8.1. *Public support within the project*..... 21
 - 8.2. *Conflict of interest* 22
 - 8.3. *Accounting for the financial support*..... 22
 - 8.4. *Document archiving* 23
 - 8.5. *Termination of the project contract*..... 23
 - 8.6. *Settlement of dispute in the administration of applications or project implementation* 23

In the framework of the Environment, Ecosystems and Climate Change Programme (hereinafter referred to as the "Programme") four areas of support were selected on the basis of stakeholder consultations. Projects will be implemented in these areas and supported by the Norwegian Financial Mechanism 2014-2021 (hereinafter „Norway Grants“).

The topic of air pollution has long been one of the priority topics of environmental protection in the Czech Republic, a specific topic is the issue of air pollution caused by inappropriate household heating. Call No. SGS-2 called "Svalbard" is therefore open within the Programme, which focuses on supporting the monitoring and identification of local air pollution caused by local heating. Applicants from among legal entities can receive support for projects aimed at ensuring local air quality measurement with an emphasis on the issue of household heating. The total allocation of the call "Svalbard," which is named after the well-known Norwegian archipelago, was set at CZK 25 000 000 (1 000 000 EUR).¹ You can find more information about this area of support in the informative manual of the Programme, [here](#).

What are the essential legal documents and methodological guidelines?

The main regulations and guidelines based on relevant Norwegian Financial Mechanism and national legislative rules and other documents related to this Call include in particular:

- Regulation on the implementation of the Norwegian Financial Mechanism (FM) 2014-2021 (hereinafter referred to as the "Regulation");
- The Programme agreement including Annexes and amendments;
- Methodology of financial flows, control and certification of programmes financed from the EEA and Norwegian FM 2014-2021;
- Guideline of the National Focal Point for eligible expenditures under the EEA/Norwegian FM 2014-2021 (hereinafter the „Guideline for Eligible Expenditures“).

These documents, including their current versions and other related methodological instructions, can be found on the website of the State Environmental Fund of the Czech Republic (hereinafter referred to as the "SEF"), [here](#).

1. Who is an eligible project promoter and who can be a project partner?

Any entity, public or private, commercial or non-commercial and non-governmental organisations, established as a **legal person** on the territory of the Czech Republic are considered **eligible project promoters** under the Call "**Svalbard**" from the Programme. This project promoter shall not be in bankruptcy, liquidation, has no overdue liabilities to state and public budgets, tax arrears and it is not a business company in which a public official² or a person controlled by him owns a share representing at least 25 % of the shareholder's participation in the business company. This also applies to their project partners, which shall be entities established as a legal person either in Norway, the Czech Republic or another beneficiary state³ or any international organisation or body or agency thereof, *actively involved in and effectively contributing to, the implementation of a project*. Partnership with foreign entities (mainly from Norway) **is not obligatory for the implementation of the project**, but with regard to the possibility of sharing experience and good practice, such partnerships are encouraged.

¹ The EUR / CZK exchange rate applied for this call is 1 EUR = 25 CZK

² according to § 4 c), Act No. 159/2006 Coll., on Conflicts of Interest

³ The list of beneficiary countries is available on the website of the Financial Mechanisms Office in Brussels: <https://eeagrants.org/countries>

In the case of the existence of a partnership in the implementation of the project, the mandatory annex to the application is the **Partnership Agreement** (Partnership Agreement Template available [here](#)), its proposal or notification of the intention to cooperate (Letter of Intent). The final Partnership Agreement must be submitted to the SEF no later than in the phase before signing the contract with the SEF. The Partnership Agreement must specify at least the following particulars (acc. Article 7.7(2) of the Regulation):

- a) provisions on the roles and responsibilities of the parties;
- b) provisions on the financial arrangements between the parties, including, but not limited to, which expenditure the project partners can get reimbursed from the project budget;
- c) provisions on the method of calculating indirect costs and their maximum amount;
- d) currency exchange rules for such expenditure and its reimbursement;
- e) provisions on audits on the project partners;
- f) a detailed budget;
- g) provisions on dispute resolution;
- h) and other provisions relating to the implementation and administration of the project, including the condition of archiving accounting documents.

The partnership in the project must not be purposefully created with the aim of circumventing supplier-customer relations. As part of the evaluation of the application, the adequacy of the project partner will always be assessed by the external evaluators and the Selection Committee. *Expenditures incurred under a valid partnership agreement can be claimed for a given period in accordance with the budget specified in the partnership agreement and only according to the procedure described in ch. 2.4 of this call. The **project promoter** has the **overall responsibility** for the correct and efficient use of the awarded grant and has legal and financial responsibility to the Programme Operator based on the legal act (project contract).*

2. What projects and activities are supported by the Call?

This part of the Call describes in detail the types of projects supported by the Call. The chapter sets out what the eligible costs of the project are, and how they are determined, and the possible procedures for reimbursing the eligible costs to the project partner.

2.1. Types of supported projects and activities

Supported activities within the framework of call no. SGS-2 "Svalbard" from the Programme are:

- A) acquisition and installation of air quality sensors for the purpose of local monitoring with an emphasis on the issue of household heating (so-called local heating plants), while the sensor measurement of air quality must be simultaneously verified by a reference measurement,
or
- B) provision of medium-term local air quality measurement with an emphasis on the issue of household heating (so-called local heating plants).

As an accompanying measure, the acquisition and installation of accompanying information equipment (including software) enabling the recording and provision of data from the measurement performed may be supported.

Detailed specifications of devices / services, conditions for air quality measurement and requirements for project outputs are given in Annex No. 1 of this call.

2.2. Eligible project expenditures

The Programme may support projects that comply with applicable legislation, the rules of the Norwegian Financial Mechanism 2014-2021, Guideline for Eligible Expenditure and the conditions of support set out in this Call.

Expenditures incurred within the project must be *proportionate* (corresponding to the usual prices in given time and place), *necessary* and in accordance with the *3E principles* (economy, efficiency and effectiveness), and in accordance with the procurement rules (for basic information see [the Guidelines of the State Environmental Fund of the Czech Republic for Public Procurement, here](#). All costs must be clearly *identifiable, verifiable and documented* (i.e. by supplier invoices or other documents of equivalent probative value) and must be incurred and recorded in bank accounts or must be supported by cash receipts and properly kept in the accounts of the final beneficiary and its potential partners. It must be clear from the accounting documents (invoices, receipts, contracts, etc.) that they relate to the Norway Grants 2014-2021 (e.g. by providing information in the text of the accounting document or by stamping the text “Financed from Norway Grants 2014-2021” or by indicating the name of the accounting center or another clearly identifiable code of the EEA/Norway Grants on the accounting document, etc.). As part of the evaluation of applications, the State Environmental Fund and the Selection Committee will assess the adequacy and necessity of expenditures in relation to the planned outputs of the project.

For projects constituting state aid, it must be met that the eligible expenditures comply with the conditions of the relevant regulation, if such a condition is stipulated in the regulation.

In **general terms**, the eligible costs under this Call will be those that:

- a) comply with the legal framework and conditions of the Programme and this Call;
- b) are directly and exclusively linked to the implementation of the project and are included and approved within its budget;
- c) are proportionate (in accordance with 3E principles and/or procurement rules);
- d) incurred after the date of the grant award decision;
- e) were incurred no later than the project completion date, but no later than 30 April 2024; (expenditure is eligible even if it has been paid no later than 30 days from the final date of eligibility of expenditure, if the invoice for the related cost was issued in the last month of eligibility of expenditure);
- f) were spent in the form of volunteer work (for project or project partners such as NGOs or social partners only), they fulfill the conditions of ch. 5.4 of the Guideline for Eligible Expenditure⁴;
- g) were incurred for the sole purpose of achieving the objective(s) of the project and its expected outcome(s), in a manner consistent with the principles of economy, efficiency and effectiveness;
- h) comply with the requirements of applicable tax and social legislation;
- i) have not been carried out by a company with a conflict of interest.⁵

In addition, for expenditures meeting the general eligibility conditions defined above, **specific conditions** are set out within the different categories of expenditure described in more detail in the Guideline for Eligible Expenditures, while other expenditures are not considered eligible.

⁴ Available at <https://www.sfzp.cz/en/norway-grants/documents/>

⁵ Within the meaning of Section 4b of Act No. 159/2006 Coll., on Conflicts of Interest, as amended, eligible expenses may not include expenses incurred for the performance of a public contract by a supplier, contractor or service provider which is a company in which the public official in § 2 par. 1 let. c) of this Act, or the person controlled by it owns a share representing at least 25% of the partner's participation in this business company and further expenses incurred in the performance of the public contract may not be included in eligible expenses within the meaning of Section 44 of Act No. 134/2016 in which an undisclosed or insufficiently limited conflict of interest has been identified and the tenderer concerned has succeeded in securing this public contract.

2.2.1. Direct costs

Direct costs are expenditures that directly and exclusively serve to achieve the objectives, purpose of the project and are in accordance with ch. 3.1. points a) to g) of the Guideline for Eligible Expenditure. Expenditures must be used to finance and implement supported activities (according to the ch. 2.1 of this Call).

These expenditures also include expenditures on the preparation of supporting analyses and studies (eg feasibility studies, especially for projects within the transfer of examples of good practice), if they are the basis for the subsequent physical implementation of the project. or, on the contrary, if they are the basis for its evaluation after the end of the physical implementation of the activities, while the expenses for such analyses/studies may not exceed 25 % of the total eligible expenses of the project.

In addition to expenditures on the physical implementation of the above measures, direct implementation expenditures also include expenditures on the purchase of new or used equipment,⁶ expenditures on consumer property and goods, and expenditures that are in accordance with chapter 3.1 points a) to g) of the Guideline for Eligible Expenditures, provided that they are identifiable and assigned to the project.

A) Expenditures on supplies, services, fixed assets and consumer property

Direct costs refer to expenditure on services and supplies, fixed assets and consumables that **directly and exclusively serves to achieve the objectives and purpose of the project** (see above).

B) Personnel costs

Wages and salaries of personnel related to staffing of activities related to the implementation of the supported project, which are not provided by suppliers. These expenditures are eligible under the following conditions:

1. the activities are carried out in the **form of agreements on work** performed outside the employment relationship (contract for work activity/agreement to complete a job), where such agreements cannot be concluded with existing employees of the applicant or project partner who are simultaneously employed or have a similar contractual relationship. Such agreements shall also include the type and description of the action taken to implement the project, including its title. The amount of remuneration (income) must be the usual amount at the place and time, i.e. it should be derived
 - **For Czech applicants/project partners:** in the case of Czech applicants and their Czech partners, wage (personnel) expenses amount to max. 1.5 times the average gross wage for 2021.⁷
 - **In the case of foreign project partners,** from the average national annual wage increased by max. 25 %, issued by Eurostat⁸, converted at the relevant exchange rate to CZK or NOK, according to the average annual exchange rate presented by the European Central Bank.⁹

⁶ If new or used equipment is purchased, only an amount of tax depreciation corresponding to the duration of the project and the degree of actual use of the equipment for the purposes of the project can be considered as eligible expenditure.

⁷ For 2021, according to The Czech Statistical Office, the average gross wage was CZK 37,839 (see <https://www.czso.cz/csu/czso/cr/prumerne-mzdy-4-ctvrtleti-2021>).

⁸ The average annual net wages published by Eurostat are available on the website: http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=earn_nt_net

⁹ The average annual exchange rates can be obtained on the website of the European Central Bank <https://sdw.ecb.europa.eu/browse.do?node=1495>

2. the activities are **carried out by the existing staff of the applicant or project partner**, who are **simultaneously employed** or have a similar contractual relationship. For the calculation, the amount of nominal wages specified in the Guideline for Eligible Expenditure is considered, in proportion to the working time in which the employee participates in the implementation of the project according to the concluded employment contract or amendment to the existing contract with the employer¹⁰. The individual workloads cannot overlap, they can only be complemented and can total up to 1.5 workloads and the basis for calculating the salary up to the permitted length of 1.5 is the amount of the employee's current nominal salary.

The applicant will be invited to submit an employment contract, concluded amendment or agreement on work performed outside the employment relationship. The reporting of overtime work by the beneficiary's staff as a project implementation work is not allowed and is therefore not considered as eligible expenditure. The wage expenditure of the final beneficiary during the project implementation is documented and verified by means of wage sheets on which the reported activities, their scope and a brief description are recorded. The wage expenditure of part-time or fixed-share employees specified in the contract or in the job description shall be verified in the course of the project in accordance with the Guideline for Eligible Expenditures. Final beneficiaries are recommended to use standardized forms available on the SEF CR website for reporting wage expenditures.¹¹

Wage costs are eligible in the amount of nominal wages/salaries under the above conditions, including supplements and remunerations, statutory health insurance and social security contributions paid by the employer according to the Guideline for Eligible Expenditures.

C) Travel expenses

Travel expenses, under this call, are considered as objective, substantively correct expenditure of the Final Beneficiary or his partner(s) incurred in direct connection with the fulfillment of the subject and project and to fulfill its requirements. Expenditure shall be in accordance with the applicable legislation of your country (foreign and foreign participants) and in accounting documents or for those that can only be used for foreign entities on foreign trips. This expenditure is eligible to the extent specified in ch. 3.1.2. Travel expenses, in the Guideline for Eligible Expenditures.

D) Promotion of the project and informing the public

Eligible expenditure for the project promotion and public information that has to be included in the project application and its budget are eligible up to a maximum of 3 % of total eligible expenditure.

The conditions and specifications for the creation and funding of publicity tools are set out in the separate *Publicity Manual for Applicants and Final Beneficiaries in the Environment, Ecosystems and Climate Change Programme*, which can be found [here](#). All promotional activities shall be stated in the **Project Communication Plan**.

¹⁰ In the case that the employee participates in the implementation of the project only part of his / her working hours, only expenses that correspond to the relevant share of the employee's working time in the implementation of the project in the employee's total time are eligible personal expenses.

If the hourly rate is not specified in the employment contract, but only the share of working time on the given project, the wage calculation can be based on the ratio of working hours on the project for a given month to total employee hours worked in a given month.

¹¹ <https://www.sfzp.cz/dotace-a-pujcky/norske-fondy/dokumenty>

2.2.2. Indirect costs

Indirect costs are all eligible costs that cannot be identified by the project promoter and/or the project partner as being directly attributed to the project but which can be identified and justified by its accounting system as being incurred in direct relationship with the eligible direct costs attributed to the project. **They may not include any eligible direct costs** and shall represent a fair apportionment of the overall overheads of the project promoter or the project partner. Such costs may relate to running the beneficiary organization according to the Guideline for Eligible Expenditure – ch. 3.2 letters b.), c.) or e.) such as renting an office, purchasing water, fuel, energy, cleaning, maintenance, insurance, office supplies, internet and telephone services provider's payment, postage, operating a company car and spending on cross-cutting activities such as human resources management, book keeping and administration, trainings, legal advice, etc.

Project promoters and project partners may identify their indirect costs according to one of the following methods:

- **a flat rate of up to 25 % of total direct eligible (net) costs** excluding direct eligible costs on subcontracting (on the basis of a contract/order) including costs on resources provided by third parties not used by the beneficiary on his premises. Third parties are those organizations or persons that are involved in the project but are not a party to the legal act on the allocation of funds. The use of this method is conditional on the calculation of a rate based on a reasonable and verifiable method of calculation or one of the methods that are applied to similar types of projects and beneficiaries under grant schemes fully funded by the Beneficiary State. The calculation method must be maintained throughout the project / (incl. Final accounts and any follow-up audit). The calculation methodology serves as a supporting accounting document and the beneficiary must be able to document it during and after the end of the project;
- **a flat rate of up to 15% of direct eligible staff costs** (determined according to chapter 2.3.1. letter B of the call), without there being a requirement for the Programme Operator to perform a calculation to determine the applicable rate;
- in the case of **project partners that are international organisations or bodies or agencies thereof**, indirect costs may, in line with specific provisions in the programme agreement, be identified in accordance with the relevant rules established by such organisations.

2.2.3. Other information for eligible costs

Value Added Tax (VAT)

It is advisable to assess or consult with experts on a case-by-case basis with regard to the individual operating conditions of the project promoter.

In general terms, the financial support for the implementation of a project does not in itself affect the amount of VAT applied by the project promoter of the taxable supplies subsequently received. The grant plays a role as a "source of funding" and only the purpose of its use (specific performance) is decisive for the amount of the VAT claim. As regards the support of activities falling within the provisions of Article 72 (2a) of Act No. 235/2004 Coll., on VAT, as amended, taxpayers arises full right to deduct VAT on the input, and in this case the deduction claim must be reduced according to Article 76 of the Act, i.e. not included in the required amount of the grant. In the case of grants for action, not being taxable transactions (e.g. non-commercial research and development) the taxpayer is not entitled to deduct VAT, thus VAT is included in the required amount of the grant.

Voluntary work

In case of projects where the project promoter is an NGO or a social partner (employers' associations and trade unions), in-kind contribution in the form of **voluntary work** may constitute up to 50% of the co-financing required for the project. In that case, both the project promoter and its partner (if the partner is also an NGO or a social partner) can report this volunteer work also as a

non-governmental non-profit organization or a social partner (see ch. 5.4. in the Guideline for Eligible Expenditure).

Voluntary activity means a publicly beneficial activity organised pursuant to Act No. 198/2002 Coll., on voluntary service and amending some other acts (the Voluntary Service Act), as amended, and a publicly beneficial activity that is carried out by a volunteer who has reached at least 15 years of age, based on their free will, in their free time and without receiving any remuneration, reciprocal service or other advantage¹².

Appropriate unit prices for voluntary work which shall be in accordance with salary normally paid for such work in given time and place are based on gross monthly wage for the region.

For determining the unit price for volunteer work, the level of the tariffs shall be based on the amounts at the usual time and place where:

- *in the case of Czech applicants and their Czech partners*, when determining the unit price for volunteer work, we recommend based on the median gross monthly wage¹³ in the wage sphere for the previous calendar year. To calculate the hourly price of a volunteer's work, this median is divided by the average number of hours worked in a calendar month and then rounded up to whole crowns.
- for foreign project partners, average national gross annual wage increased by max. 25 %, issued by Eurostat¹⁴, related to the year preceding the year of implementation, converted at the relevant exchange rate to CZK or NOK (or other currencies), according to the average annual exchange rate given by the European Central Bank.¹⁵

The records of voluntary work are not part of the accounting records under the project because they represent neither costs nor expenditures. However, project promoters must keep conclusive records of the performance of volunteering, proving the time and scope of voluntary work.

Extra work up to the maximum of project grant

All eligible costs can only be increased assuming that all other conditions of this chapter 2.2 are fulfilled. The costs incurred must be objective, factually correct, serving to fulfill the objectives and purpose of the project, incurred by the beneficiary, and are not included in the original price of the contract (order, etc.) for the work concluded between the project promoter and the supplier. These additional costs are further eligible provided that, when included in the total eligible costs of the project, the maximum **amount of financial support determined by the Decision on the provision of financial support**, respectively by the Grant Agreement, will be respected. They must be approved by the Fund and their implementation must comply with other rules and regulations for their application (in particular in accordance with the The Guidelines of the State Environmental Fund of the Czech Republic for Public Procurement).

Offsetting of receivables

In case of offsetting of receivables between the beneficiary and the contractor (payment of the invoice is not fully documented by a bank statement), it is always necessary to submit a written contract / agreement to set off mutual performance of the same type (receivables and payables) the relationship between the beneficiary of the invoice and the invoicing contractor, signed by both the beneficiary and the contractor. This mutual agreement must be concluded in accordance with the law. The agreement must state the contracting parties, project and invoice identification (s) (in the case of a different variable symbol compared to the invoice number, it is advisable to state the

¹² Does not apply to food and accommodation provided.

¹³ According to the information system on the average monthly gross wage of the Ministry of Labor and Social Affairs of the Czech Republic (<https://www.ispv.cz>).

¹⁴ The average annual gross wages published by Eurostat are given on the website http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=earn_nt_net

¹⁵ Average annual exchange rates can be obtained on the website of the European Central Bank <https://sdw.ecb.europa.eu/browse.do?node=1495>

variable symbol), mutually offset amounts and currencies, the signature date of the contracting parties and the signatures of both parties.

2.2.4. Non-eligible expenditures

The following costs, in accordance with the Guideline for Eligible Expenditures, shall not be considered eligible (acc. to Article 8.7 (2) of the Regulation):

- a) interest on debt, debt service charges and late payment charges;
- b) charges for financial transactions and other purely financial costs, except costs related to accounts required by the Norwegian Ministry of Foreign Affairs, the National Focal Point or the applicable law and costs of financial services imposed by the project contract;
- c) provisions for losses or potential future liabilities;
- d) exchange losses;
- e) recoverable VAT (ie VAT with the right to deduct input tax);
- f) costs that are covered by other sources;
- g) fines, penalties and costs of litigation, except where litigation is an integral and necessary component for achieving the outcomes of the project; and
- h) excessive or reckless expenditure.

The detailed description of the non-eligible expenditures may be found in the [Guideline for Eligible Expenditures](#).

In order to avoid double funding, the applicant may only use funds under this Call for implementation of eligible project expenditures. The applicant is not allowed to draw any other subsidy funds for specific items of eligible project costs stated in payment request (except of the use of resources for securing the Applicants' own resources). In this case, the applicant is obliged to ensure that these funds are consistently separated both in the relevant accounting documents and in the projects accounting and it can be demonstrated at any time that there is no concurrence of aid for a specific expenditure item.

2.3. Reimbursement of project partner expenses

Only incurred, reported and documented expenditures of the project partner can be claimed as eligible expenditures of the project.

Based on the partnership agreement a project promoter may provide an advance payment to the project partner but such payment is not eligible expenditure.

In the partnership agreement, it is possible to agree on one of the following **methods of reimbursing the expenditures of a project partner**:

- a. The project promoter, after checking and verifying the eligibility of the partner's expenditure, **will include these expenditures among the eligible expenditures in the list of documents / payment requests**. The partner's expenditure is reported by submitting a copy of the accounting document, a document proving its non-cash payment or by submitting an audit report. After checking and verifying the eligibility of the partner's expenditure the project promoter includes it among **eligible expenditures** in the relevant list of documents/payment requests. As the payment request is completed in CZK, the conversion of foreign currency to CZK is carried out using the monthly rate of ECB valid for the month in which the expenditure was paid¹⁶. After the reimbursement by the SEF to the project promoter's bank account, the project promoter is

¹⁶ https://www.ecb.europa.eu/stats/policy_and_exchange_rates/euro_reference_exchange_rates/html/eurofxref-graph-czk.en.html

obliged to transfer the amount for the relevant eligible expenditure to the partner (according to the conditions and methods laid down in the partnership agreement);

- b. The project promoter **directly reimburses the expenditure to the project partner** after checking and verifying the eligibility of expenditure. The partner reports the incurred expenses by submitting a copy of the accounting document and the document proving the reimbursement of the expenses. The project promoter shall subsequently include this expenditure in the relevant list of documents/payment requests (as expenditure of project promoter, evidenced with a copy of the document proving the reimbursement of the expenditure to the partner);
- c. The costs of project partner **can be directly paid by the project promoter** (e.g. payment of invoices issued to the partner);
- d. If the Czech project partner is a contributory organisation financed only by the project promoter's **organization who is its founder, the founder shall** increase the contribution for the project partner that will be used for financing of the project's eligible expenditures and subsequently the founder will include such expenditures in the list of documents/payment requests.

3. What outcomes and outputs shall the project contribute to and what indicators shall be reported?

In the Czech Republic, the problem of using unsuitable types of solid fuels as a primary source of energy (share approximately 44 %) is faced, for example, by municipalities in foothill areas.

In the autumn and winter months, the inhabitants of these municipalities face increased concentrations of pollutants, while the overall adverse effect is amplified by the surrounding relief. The programme will provide funds for the installation of monitoring sensors, which will allow a better understanding of the share of pollution coming from household heating and will help to evaluate how serious a problem it is in a specific location and, if necessary, whether the measures implemented in the municipality so far are sufficient.

The contribution of the projects, specified in more detail in point 2.1. of the call, is above all obtaining more detailed information on the share of household heating in total air pollution in municipalities, which in the future will enable more effective planning of new activities in the field of air protection and also help to evaluate how effective some of the measures already in use are.

Mandatory indicators help to identify and measure the achievement of the set outputs and outcomes of the project itself, and they are **always part of the Application**.

Mandatory elective indicators are part of the Application if they are relevant to the project.

Optional indicators are also listed in the Application if they are relevant for the given project, but their fulfillment is not binding.

Binding indicators will be the subject of a contractual obligation, their fulfillment is documented by the final beneficiary within the Final Monitoring Report.

Indicators are obligatory set by the applicant within the preparation of applications directly in the electronic environment [Agenda Information System of the State Environmental Fund of the Czech Republic](#) (hereinafter referred to as „AIS SEF) in **the list of project indicators**. applicant must include the initial status (baseline value) and the intended status (target value) of the selected indicators. Their reporting is also an obligatory part of every interim or final monitoring report.

In the framework of this **Call-SGS 2 „Svalbard“** the relevant indicators are:

The list of indicators	Description of the indicator
<p><i>Number of installed air quality monitoring systems related to domestic/local heating (mandatory, binding)</i></p>	<p><i>The number of areas in which air quality measurements were carried out with an emphasis on household heating in a given locality and in which the share of these households in local air pollution was identified.</i></p> <p><i>The initial status (baseline value) of the indicator is always 0.</i></p>

In case of involvement of Norwegian entities in the project, the following bilateral indicators are also mandatory:

The list of bilateral indicators	Description of the indicators
<p><i>Number of projects involving cooperation with a donor project partner (mandatory elective, binding)</i></p>	<p>The indicator determines how many projects have been implemented in cooperation with a partner from Norway.</p> <p>The initial value of the indicator is always 0. The target value at the project level is usually 1.</p>
<p><i>Number of international networks where partners from Beneficiary States and Donor States participate together (optional, non-binding)</i></p>	<p>The indicator determines the number of international networks focused on environmental issues, in which partners from the Czech Republic and Norway jointly participate in the activities carried out within these networks.</p> <p>The initial value of the indicator is always 0.</p>

4. What is the amount of project grants?

Financial support for the projects specified in ch. 2.1 of this Call will be provided in the form of a grant. Maximum project grant rate may be **up to 90 % of eligible expenditure of the project**, whereas the amount of grant assistance applied for **shall not be less than 250,000 CZK (10,000 EUR) and not more than 2,500,000 CZK (100,000 EUR)** according to the course settled for this call¹⁷. The project promoter will provide co-financing of at least 10% of the total eligible project expenditure.

In case the support is provided in the de minimis regime (see chapter 8.1. of the call) and the applicant (together with partners, if relevant) has already drawn support in this regime in the last three consecutive accounting periods, it is possible to provide the applicant with the support with regard to the fulfillment of the de minimis support limit, the condition being the fulfillment of the minimum support amount of 10,000 EUR.

¹⁷ The Exchange rate given for this call is 1 EUR = 25 CZK.

5. How is the application administered?

5.1. The submission of the application

The applications may be **submitted from December 9, 2022 at 12:00 p.m., until February 9, 2023 at 12:00 p.m. at the latest**, electronically via the AIS SEF which is available from the website:

<https://zadosti.sfzp.cz/>

The procedure for application submission in the AIS SEF is described in detail [here](#).

The application must be processed in the Czech language accompanied by a brief description in English. The estimated budget must be stated in Czech crowns (CZK), while the total budget of the project will also contain an aliquot amount in Euro (according to the EUR/CZK exchange rate set out in this Call).

Mandatory attachments of the application:

- proof of bank account maintenance;
- the project's Communication Plan;
- if relevant, the Partnership Agreement, its proposal or Letter of Intent in accordance with the ch. 1 of the Call;
- if relevant, the applicant shall also submit project or similar documentation which proves the technical solutions of the proposed measure.
- if relevant, the applicant shall submit documents according to the Guidelines of SEF on the evaluation of a company in difficulties¹⁸ (download [here](#));
- in the case of applicants with the legal form of a company, the applicant shall also submit documents to verify the ownership structure in order to avoid potential conflicts of interest pursuant to Act No. 159/2006 Coll., On conflicts of interest and in accordance with Act No. 37/2021 Coll., On the records of beneficial owners. The applicant proves them by completing a solemn declaration on the real owners of the legal entity (download the form [here](#)).

5.2. Evaluation of the application

The submitted application is first assessed in terms of formal requirements (administrative criteria) and justification (eligibility criteria) of the application. Within the control of **formal requirements** the application will be assessed according to the following list of criteria:

- the application has been processed via AIS SEF;
- the application is processed in Czech and accompanied by a brief description in English;
- the application is complete.

Within the control of **overall eligibility** the application will be assessed according to the following list of criteria:

- the application is submitted by an eligible applicant according to this call (*eliminating criterion*);
- there is only one application per project (*eliminating criterion*);

¹⁸ For projects fulfilling features of state aid, with the exception of de minimis support, the control will be made to ensure that the applicant is not a company in difficulties according to COMMISSION REGULATION (EU) No 651/2014 Article 2, Point 18. In this case, the SEF will prior to the approval of the support and the issuance of the Minister's Decision, the necessary current financial statements for evaluation according to the Guidelines of SEF on the evaluation of a company in difficulties available at www.sfzp.cz

- potential project partner is eligible;
- the application contains a list of any consultant involved in preparation of the application;
- the budget of the project is given in CZK;
- the application is in accordance with the Programme and chapter 2.1 of the call (elimination criterion).

No modification of the application is allowed after the deadline for submission of applications, including a possible evaluation of whether the applicant is not a company in difficulties. However, if there is a need to clarify certain aspects or for the correction of clerical mistakes, the PO may contact the applicant to ensure their correction or complete a request for additional information or documents within a specified period, usually 5 working days (unless for objective reasons otherwise agreed). The application is then made available to the applicant for editing directly in the AIS SEF. If the application does not meet the overall eligibility and formal requirements, it will be decided to terminate its administration. The applicant is given 5 working days to appeal that decision to SEF.

Once the formal requirements and overall eligibility are met, the application is accepted and forwarded to the evaluation process. During this process the applicant may be required to provide additional technical, financial or factual clarification of the explanation of the accepted application including, where appropriate, reconciling the budget changes without affecting the essentials of the project regarding the eligibility of expenditure under the project in accordance with the eligibility principles of the Programme, without affecting the essentials of the project. *The additional specifications required during the evaluation of the application must not change the substance and purpose of the project!* Technical, financial and factual evaluation of the application takes place in the form of a cross-evaluation by two independent evaluators (the so-called four-eye check)¹⁹ according to the list of evaluation criteria below²⁰. For each criterion fulfilled, the application gains the appropriate number of points according to the score in the table below. If the application does not meet a given criterion, the scoring is zero in that criterion.

Method of evaluating applications (evaluation criteria)

The evaluation of the project will be **based on assignment of point evaluation criteria** according to the nature and focus of the project:

The evaluation of the project will be based on the calculation of the cost-effectiveness of the project, according to the formula below, and by assigning further evaluation criteria according to the nature and focus of the project:

$$\frac{C_{mon}}{C_{total}} * 7 = \text{number of points (rounded to an integer)}$$

where:

C_{mon} direct implementation costs of the project **to ensure air quality monitoring**: acquisition and installation of sensors, performance of sensor measurements, acquisition and installation of accompanying information equipment (including software) in accordance with the activities listed in ch. 2.1 calls (in thousands of CZK, rounded to 2 decimal places)

C_{total} **total eligible project expenses** (in thousands of CZK, rounded to 2 decimal places)

¹⁹ If the difference between the scores given by the two evaluators is more than 30% the project application shall be scored by a third evaluator (the average score of the two closest scores shall be used for the ranking of the project application).

²⁰ The fulfillment of the evaluation criteria of the application will also be subject to the final evaluation of the project.

APPROACH TO COOPERATION (max. 7 points) – optional criterion

Project partner from Norway	Direct cooperation of the applicant with a project partner from Norway	+ 2 pt.
Other international project partner	A direct cooperation of the applicant with another international project partner(s)	+ 1 pt.
National project Partner	A direct cooperation of the applicant with another national project partner(s)	+ 1 pt.
Link between the application and other projects and bilateral initiatives supported by the EEA and Norway Grants	<i>The projects follows its focus on other already supported/implemented projects or bilateral initiatives within the EEA or Norway Grants. The project follows on:</i>	
	<ul style="list-style-type: none"> supported / implemented bilateral initiative between the applicant and another foreign entity (entities) from EEA countries (outside the EU). 	+ 1 pt.
	<ul style="list-style-type: none"> the partner entity (entities) from the supported / implemented bilateral initiative is (are) also the partners of the submitted application 	+ 1 pt.
	<ul style="list-style-type: none"> supported project financed from EEA and Norway Grants (same and different applicant) in the current (2014-2021) and previous programming periods 	+ 1 pt.

The evaluated application proceeds further into the process of its assessment and final approval or rejection (see chapter 5.3).

5.3. Project selection and approval process

The application is after the evaluation process subject to assessment by the **Selection Committee**. The Selection Committee shall review the list of projects recommended for the grant award from the Programme, based on ranking of these projects, and may request verification of the ranking in justified cases. The list of ranked project is submitted to the SEF Advisory Board and subsequently to the Minister of the Environment (hereinafter the Minister).

The Selection Committee, based on information provided from previous evaluation of each application, statement of each member of the committee, respectively observer´s recommendations, votes on the ranking of submitted applications, with:

- a) *The applications that **meet the minimum required score of 3 points** (set out in point 5.2. of this call) and at the same time don´t exceed the total allocation of the Call, are recommended by the Selection Committee for support. (In case of substantial justification, the Selection Committee has the possibility to adjust the order of applications), with the exception of projects in point d).*
- b) *The applications, that **meet the minimum required score of 3 points**, (set out in point 5.2. of this call) but their rank exceeds the available allocation, may be added to the reserve list, with the exception of projects in point d). The Selection Committee decides on the creation of a reserve list (project pool), which also defines the conditions under which the applications can be submitted to the approval process. In case of submitting the application from the pool, the formal requisites of the submitted application (deadlines, contact persons) will be updated, but at the same time the changes that would affect the substance of approved projects/applications are prohibited.*
- c) *The applications that do not reach the minimum required score, will be proposed for rejection and will be issued a Decision of the Minister not to provide support from the Programme funds.*

- d) *The applications from applicants who meet the characteristics of public support and at the same time do not meet all the conditions of any of the relevant regulations for VP or de minimis support cannot be applied for will be proposed for rejection and issued a Minister's decision not to provide support from the Programme.*
- e) *The applications from the applicants who meet the definition of a firm in difficulty will be proposed for rejection and will be issued a Decision of the Minister not to provide support from the Programme funds.*

After consideration of the recommended applications by the **SEF Advisory Board** and after verification of the evaluation process, the applications are submitted to the **Minister** for approval. The Minister shall issue a *Decision on the provision of financial support*, which is subsequently entered into the AIS SEF, always for the respective project, and the applicant will receive the original Decision. The list of supported projects shall be publicised on the webpage of the [Fund](#).

In the case the application is proposed *to be rejected* by the Selection Committee, which is also confirmed by the Council of the SEF, the applicant is announced in writing - by sending the issued Decision on not the provision of financial support from the Programme.

5.4. Project contract

The project contract for the grant from the Programme is concluded after verification of the evaluation process and after the issuance of Ministry's Decision between the SEF and the project promoter, usually within 2 months of issuing the Decision. The project contract contains the maximum amount of provided financial support, specifies the purpose and objective of the supported project, the rights and obligations of both contracting parties, including possible financial corrections.

The successful applicant is obliged, upon request of the relevant project manager of the Fund, to update the Documents for the agreements on the provision of subsidies from the Programme funds in the AIS SEF. The applicant will update the expected start and completion date of the project on profile, if relevant the applicant the submitted budget and sources of funding of the contract and documents other relevant annexes set out in the call. The financial payment calendar will be generated on the basis of the data specified in the sources of financing after the submission of the documents to the SEF via AIS SEF.

Before signing the contract the project promoter is obliged to provide *necessary documents and information*, in particular:

- proof of authorization to negotiate with the SEF (if the authorized person acts as the project promoter);
- if needed, necessary documents updating the situation compared to the documents submitted in the application;
- employment contracts, wage assessments, possible amendments to the original employment contract, agreements on work performed outside the employment relationship (Contract for work activity/Agreement to complete a job), concluded prior to the occurrence of the relevant personal expenses;
- signed partnership agreement on both sides (if relevant for the project).

5.5. Project amendment request

The project amendment request may be submitted at the earliest after the Decision has been issued and no later than the date of submission of the Final monitoring report. The Project promoter is obliged to immediately notify the SEF of any changes (e.g. identification and contact data, project parameters, project implementation conditions, facts and conditions contained in the contract, etc.) to the relevant project manager through the AIS SEF.

The project manager assesses the project amendment request in particular in terms of its eligibility, other conditions of the call and the Decision or the project contract. The SEF shall issue a standpoint on the submitted request. If the standpoint contains the conditions for the change of a Decision or

conclusion of an amendment to the project contract, the final beneficiary shall provide the relevant project manager with the required documentation and all cooperation for the implementation of the required change. If the SEF's standpoint is negative, no change to the project is possible and all the expenditures related to the project amendment are considered as ineligible.

Any changes, in particular the budget and the scope of the planned activities, which may affect the evaluation and ranking of applications or compliance with the conditions of public support are not allowed.

6. What is the implementation period of approved projects?

There is no minimum duration of project implementation under this call, but projects **must be completed by April 30, 2024**, which is the deadline for eligibility of project expenditures in this call.

6.1. Procurement within the project

The procurement rules within the projects implemented within the supported project are in a separate document called *The Guidelines of the State Environmental Fund of the Czech Republic for Public Procurement*, which is part of the Programme's basic information documents and which you can find [here](#).

The contract for the execution of some supplies or services included in the application may be initiated before its approval, but the subject matter of the contract and the related payment must be made after the initial date of eligibility of expenditures. The contract with the winning contractor may be signed earlier on condition that the subject-matter of the contract will be executed only if the support was approved.

The applicant submits all documents for public procurement in accordance with „The Guidelines of the State Environmental Fund of the Czech Republic for Public Procurement“ on an ongoing basis as part of the project implementation, but no later than the final monitoring report is submitted.

6.2. Monitoring and implementation of the project

Project implementation/realization and its progress is monitored by **interim monitoring reports**. The final status and all financial, factual and others issues related to project implementation, the project promoter shall show in **the final monitoring report**, submitted at the stage of project finalization/completion and overall the finance settlement.

The report may also include *the payment request*, which is the basis for payment of actually incurred expenditures on project implementation (see ch. 6.3). The project promoter submits the reports each six months from the time the contract becomes effective and a **final report** after the end of implementation of the project;

- for projects with an implementation **up to 6 months**, the project promoter **submits 1 final report** after the end of implementation of the project;
- for projects with an implementation period **longer than 6 months**, the project promoter submits **an interim report each six months and a final report** after completion of the project²¹.

²¹ If the project is planned for a period longer than 6 months, the final beneficiary may submit a request to merge the monitoring periods, but the monitoring period of the final report may not exceed 8 months. In exceptional cases, if the final beneficiary does not carry out any activities or expenditures in the standard six-month monitoring period, the monitoring period may be extended to 12 months upon request of the final beneficiary and subsequent approval of the SEF. The minimum monitoring period is 3 months. The monitoring period begins on the date of signing the contract with the SEF CR. The minimum length of the monitoring period is 3 months.

The interim monitoring reports, respectively the final monitoring report, are submitted electronically (via AIS SEF) no later than 1 month after the end of the reference period.²²

The submitted reports are checked for *factual, financial and formal correctness*, including eligible expenditures and overall compliance with the project contract and its annexes.

The checked documents are:

in the **text part** of the report:

- correctness of submitted monitoring report from the project schedule,
- correctness and completeness of project implementation description in the reference period,
- initiation of any changes or differences from the approved version of the application,
- the outputs and outcomes quantification (the indicator fulfillment) and the description of the results achieved in the reference period,
- indication of the existing financial performances in the settled terms (according to the AIS SEF), i.e. for total amount for the relevant reference period,
- indication of the assumption of financial performance for next period, i.e. May-October and November-April for relevant years of the project implementation.

if the **payment request** is also part of the monitoring report, there are further checked:

- the list of actually incurred expenditures, including annexes (copies of invoices, bills, etc.) and their consistency with the approved budget,
- a statement from the accounting system proving realization of payments of the project promoter or his/her partner (submission of the proofs of payment to the submitted accounting documents),
- a statement from the accounting system proving that all requested expenditures are recorded under the specific accounting cost centre for EEA and Norway Grants in the project promoter's accounting system.

In case of detected deficiencies, the project promoter is obliged to ensure their correction within 5 working days of being called.

6.3. Project financing scheme

Funds are paid to final beneficiaries in accordance with Act No. 388/1991 Coll., On the State Environmental Fund of the Czech Republic, and the Statute of the SEF²³ on the basis of a concluded contract on the provision of support (subsidies).

Projects are financed in the form of a one-off advance (ex-ante payment) after the entry into force of the Contract in the amount of a fixed percentage of the total grant (from 30 to 50 %) with subsequent billing in the form of payment requests (ex-post payments, supported by paid documents), but up to 90 % of the total grant amount. The remaining amount of the grant will be determined and financed after the final monitoring report approval.

With regard to the financial flows of the state budget, support can be provided to SPO beneficiaries only in the form of a request for payment (ex-post payment) without an advance.

²²The project expenditures are eligible until 30 April 2024, and expenditure incurred up to this deadline must be reimbursed no later than 31 May 2024.

²³ To the beneficiaries of the SCO, the funds are financed by SEF, in accordance with Section 53, Paragraph 1 of Act No. 218/2000 Coll. On budgetary rules.

The support (subsidy) can be drawn exclusively non-cash in CZK to the account of the final beneficiary²⁴ specified in the contract (and registered in the AIS SEF). Finances provided by the SEF CR within the Programme are according to their character registered under special purpose features (CA):

- 90003 Norway Grants – non-investment
- 90500 Norway Grants – investment
- 90006 Norway Grants – co-financing – non-investment
- 90503 Norway Grants – co-financing - investment

The final beneficiary may reimburse the project expenditures at the earliest after the Decision has been issued (see ch. 5.5), after the effective date of Contract (see ch. 5.6) the fixed **advanced payment**²⁵ is always provided to the final beneficiary's account, due to conditions stated in the Contract and in the amount specified in the Contract (usually not more than 10 days after signing the Contract) and the following parameters:

<i>Project implementation duration</i>	<i>Maximum Advance Payment²⁶ (% of total subsidy)</i>	<i>Interim payments</i>	<i>Final Payment</i>
≤ 12 Months	50%	≤ 40%	≥ 10%
≥ 12	30%	≤ 60%	≥ 10%

Payment requests annexed to interim/final monitoring reports must be composed of reporting on eligible expenditure incurred (settlement of the advance payment) in addition to reporting on the consumption of previous pre-financings received and the estimated entitlement to expenditure for the next period.

Each advanced payment must be included into the interim/final monitoring report and deducted from every interim/final payment request until the whole amount of the advanced payment has been exhausted.²⁷ If the advanced payment has not been fully booked in the first interim monitoring report, the same principle shall be applied for the next monitoring report. If the total amount of the advanced payment is fully posted and the payment request contains higher amount, the SEF shall pay the requested amount of the finance to the final beneficiary based on approved incurred expenditures, respectively payment request.

The final beneficiary confirms by including copies of the accounting documents in the submitted request for payment their conformity with the original kept in the accounts of final beneficiary and/or project partner.

The reimbursement of approved eligible expenditures takes place on an ongoing basis (and in accordance with conditions set above), according to progress reported and described in interim reports, up to a **maximum of 90 % of the grant provided. The remaining final balance of the grant, at least 10 %, must be part of the final report as a final payment request.** Through the final report, the final realization of the project takes place in terms of factual, financial and formal finishing of the project.

²⁴ In accordance with Act No. 218/2000 Coll., On budgetary rules, Territorial self-governing units, voluntary associations of municipalities, state funds, public research institutions, public universities, the Railway Infrastructure Administration and the General Health Insurance Company are obligated to keep the bank accounts for receiving subsidies with Czech National Bank (CNB).

²⁵ The advanced payment is not relevant for the State Organizational Units and State Contributory Organizations in accordance with Act No. 218/2000 Coll., On budgetary rules.

²⁶ Any change in the duration of the project implementation (see Chapter 5.5) does not affect the original amount of the advance payment.

²⁷ In case that the total incurred eligible costs are lower than the amount of the advance payment, the final beneficiary is obliged to return unused funds within 30 days of ringing the bank accounts of SEF of the title of the Contract.

The funds are reimbursed to the final beneficiary usually no later than 1 month after the approval of the respective monitoring report, even in the case of the final report.

State Contributory Organizations (SPO) proceed the project financing in accordance with Act No. 218/2000 Coll., On budgetary rules, as amended. Particular details of financial flows are defined in the Methodology of financial flows, control and certification of programmes financed from the EEA and Norwegian FM 2014-2021.

6.4. On-site control of the project implementation

For selected projects, progress is monitored by **on-site visits**. This monitoring can be provided by SEF CR representatives (programme manager) before the release of funds reported in the respective monitoring report, respectively payment request, and is focused on factual and financial on-site controls by comparing reality/facts with data and information from the report.

However, the on-site visits can also be provided by another representative of SEF, the Ministry of Finance, the Royal Norwegian Embassy in Prague and the Norwegian Environment Agency (Norwegian Programme partner), also the control may be provided by the Supreme Audit Office, the Financial Mechanism Office in Brussels, the Office of the Auditor General of Norway and the Norwegian Ministry of Foreign Affairs, or commissioners authorized by the SEF, other bodies authorized by the abovementioned institutions, in particular in accordance with the relevant provisions of Act No. 320/2001 Coll., on Financial Control in Public Administration and on Amendments to Certain Acts, as amended, and Implementing Decree No. 416/2004 Coll., which implements the Act on Financial Control and in accordance with the relevant rules for the provision of funding from the EEA and Norway Grants.

In case of detected significant deficiencies or high level risk identified (e.g. through monitoring reports, during the review of supporting documents for payment request or on other suggestions raising doubts about the project's factual, legal or financial nature), the on-site monitoring visit will always be carried out.

At the request of the control authorities, the project promoter shall cooperate with all of the subjects participating in the control, and provide all the relevant documents and information, demonstrating compliance with the obligations of the supported project.

6.5. Irregularities in project implementation

Irregularity shall mean any infringement of the rules governing the Norwegian Financial Mechanism 2014-2021, European Union law or national legislation, if such a breach could affect or endanger any stage of the implementation of the supported initiatives financed by Norway Grants 2014-2021.

Entities involved in the implementation of the EEA and Norway Grants 2014-2021 are required to **promptly notify** the SEF in any case of suspected irregularity. In cases of suspected serious irregularity, the SEF may suspend payments for a given initiative for the necessary time.

If the project promoter breached legal obligations, failed to comply with the purpose of the grant or breached conditions under which the grant was awarded, it it would be understood as breaching of budgetary discipline, and the SEF CR shall inform the Certification Unit, NFP and submit a request for the decision in this matter to the Tax Office.

7. How to properly promote and inform about awarded project?

When submitting the application, the applicant is obliged to submit at the same time the **Project Communication Plan**, which must be in accordance with *the [Publicity Manual for Applicants and Final Beneficiaries in the Environment, Ecosystems and Climate Change Programme](#)* (hereinafter the Publicity Manual²⁸). The supported project must meet the minimum publicity requirements during its implementation²⁹.

Communication of all projects implemented within the Programme must be in accordance with the Publicity Manual, which specifies the basic requirements and recommendations for communication within the Programme, including the graphic documentation. All the final beneficiaries under the Programme shall:

- follow the Programme Publicity Manual;
- develop and implement the Project Communication Plan, which is part of the application and is in line with the Publicity Manual;
- provide project information to the general public at appropriate national, regional and local level;
- raise awareness of Norway's assistance through the Norway Grants;
- ensure project transparency;
- regularly inform the SEF CR on the fulfillment of the communication and information obligations of the project and provide statistical data on its activities;
- inform the SEF CR about all the events related to project propagation (opening ceremonies, seminars, open days, etc.) at the latest 3 weeks before the event;
- be obliged to use logos of the EEA and Norway Grants in all materials and documents developed within the approved initiative, in the appropriate extent and in an appropriate format, see the Publicity Manual;
- provide to the SEF CR continuously a photographic documentation related to the project implementation (preferably in print quality), especially in the case of realization of physical objects, workshops, seminars etc. This material will be used to promote the Programme and may be provided to a third party;
- enable the SEF CR to visit the project implementation and take a photographic and video documentation, provide it to a third party and use this material to promote the Programme;
- inform about their project on websites, social networks (if available), or create their own project website;
- mark all orders and invoices in accordance with chapter 2.3 of this call, i.e. by stating the information in the text of the accounting document or by stamping the printed document or the text „*Funded by Norway Grants 2014-2021*“ or by stating the name of the accounting center or other identifiable EEA/Norway Grants code on the accounting document; without the designation, the expenditure will not be accepted as eligible;
- inform every project partner of its communication duties;
- to comply with other publicity obligations of the supported projects, as stipulated in the concluded project contract.

Publicity expenditures are eligible expenditures (see ch. 2.2.1. d). However, such expenditures must be in proportion to the total eligible expenditures of the project. Further details and communication requirements are also provided in the *Programme Publicity Manual*.

²⁸ Logos and Manual are available at: <https://www.sfpz.cz/dotace-a-puicky/norske-fondy/dokumenty/>

²⁹ These requirements follow from the Regulation, its ch. No. 3: Information and Communication, and Annex No. 3 to the Regulation.

8. Other elements or facts related to supported projects

During the preparation of the application for support, project implementation, and when the implementation is finished, there may be other facts that need to be taken into the whole administration process. Already in the preparation of the project plan, before compilation of the application for support, it is necessary to consider the answers to questions that are part of this chapter.

8.1. Public support within the project

Any aid provided by the State or by the State resources, which would distort or threaten to distort competition by favouring certain companies or production sector while affecting trade between Member States under article 107, (1) of the Treaty functioning of the European Union is prohibited. The form of such support is further defined by 4 basics definitions, where:

1. the support is provided by State or from public funds,
2. the support favours certain companies/undertakings or certain sectors of business production and is selective,
3. the trade between Member States is affected and
4. competition is or may be distorted.

If the project meets the above-mentioned defining features of public support, support may be granted only on the basis of secondary regulations, which take the form of regulations, decisions, guidelines or frameworks.

Individual applications for support will be assessed individually in terms of the possible fulfillment of the features of public support, and more information on this issue is available on the website of the Office for the Protection of Competition of the Czech Republic <https://www.uohs.cz/cs/verejna-podpora.html>.

De minimis support

Due to the wide scope of most projects envisaged for the Program support, most of them could meet the definition of public support and whose support amount will not reach the limit of EUR 200,000 can be supported in accordance with Commission Regulation (EU) No. 1407 / 2013 of 18 December 2013 on the application of Articles 107 and 108 of the Treaty on the Functioning of the European Union to de minimis aid. The limit of EUR 200 000 is set on the assumption that it will not distort trade or competition between Member States. However, this scheme can only be applied to one enterprise and for a period of three years (ie the current and two previous accounting periods).

The granting aid will be registered in the Central de minimis register³⁰, whereby the register records all the support provided in the same way from the different providers. Limit over reporting over the three-years period is prohibited/forbidden.

The de minimis state aid scheme is also applied if it is an economic activity carried out by a project partner.

Aid under the public service compensation scheme

Aid may be granted to undertakings entrusted with this obligation in accordance with the Commission Decision of 20 December 2011 on the application of Article 106 (2) of the Treaty on the Functioning of the European Union to State aid in the form of public service compensation granted to certain undertakings entrusted with the provision of services of general economic interest.

³⁰ Information on the Central Register of De Minimis can be found at <https://www.uohs.cz/cs/verejna-podpora/registr-de-minimis.html>

8.2. Conflict of interest

The applicant for the support from the Programme must comply with general conditions of transparency and avoidance of potential conflicts of interest. For this reason all the legal entities, including potential project partners, **are obliged to identify their ownership structure** in the application, state their real owners in order to avoid potential conflict of interest pursuant to Act No. 159/2006 Coll., on Conflicts of Interest and in the sense of Act No. 37/2021 Coll., on The registration of beneficial owners, or during the administration of the application to provide with an up-to-date list of shareholders and document changes in the ownership structure. The applicant provides with the information on the ownership structure in the application and, in the case of a company, encloses the declaration (a model solemn declaration is published in the documents of the Programme, [here](#)).

8.3. Accounting for the financial support

All the expenditures incurred in implementation of projects supported by Programme must be supported by an **output** (report or reports) **from the accounting system** which will show the accounting of all project-related transactions and be clearly identifiable from which accounting system and when it was generated. The list from the accounting system should provide at least the following information:

- date of accounting
- the document number attributable to the documented primary document
- the amounts equal to or higher than stated in primary documents
- text definitions of individual items

*The project promoters' subjects whom are obliged to classify actual and budgeted revenues and expenditures shall **proceed according to the budget structure** laid down by Act No. 218/2000 Coll., on Budgetary Rules and by Decree No. 323/2002 Coll., on Budgetary Structure, as amended, and to compile financial statements according to Decree No. 449/2009 Coll., on The manner, dates and scope of data submitted for the evaluation of the state budget, state fund budgets, budgets of territorial self-governing units, voluntary unions of municipalities and regional councils of cohesion regions, amended and registered items related to the subsidy separately.*

*Beneficiaries who keep accounting in accordance with **Decree No. 563/1991 Coll., On accounting in full or in simple scope**, shall record double-entry records on the state and movement of assets, liabilities, costs and revenues and profit/loss relating to the subsidy.*

Eligible project expenditures must be managed by:

- I. In the accounting system of the beneficiary of the support in accordance with Decree No. 563/1991 Coll., On accounting, as amended.

The beneficiary is obliged to keep separate accounting reports for monitoring and reporting of received and used subsidies in relation to the claimed eligible expenses.

or

- II. The beneficiaries who do not keep accounting system in accordance with Act No. 563/1991 Coll., On accounting, are obliged to manage tax or operative evidence extended by the following requirements:
 - *The documents must be in accordance with predefined requisites of an accounting document with the meaning § 11 Act No. 563/1991 Coll., On accounting as amended, except point f);*
 - *The documents in question must be correct, conclusive and comprehensible and kept in chronological order in a manner guaranteeing their performance;*
 - *Realized incomes and expenditures are kept with a clear link to the relevant project to which they relate, ie the project number must be clearly stated on the documents,*

especially invoices. The final beneficiary confirms by including copies of the accounting documents in the submitted request for payment their conformity with the original kept in the accounts. Bank statements proving payment do not have to be marked with the project number, but it is necessary to follow the rule of separate records;

- *The applicant is fully responsible for fulfilling the obligation to state the project number on the accounting document.*

8.4. Document archiving

The project promoter is obliged to archive all the documents related to the project preparation and implementation **for a 10 years period** from next year after the year when the Final monitoring report was approved.

8.5. Termination of the project contract

Through the whole process, from the receipt of the application for support until the project implementation process, there may be situations in which the project for support from the Programme is terminated. This happens especially in situations described below:

Expiry of the Decision

If the applicant does not submit required documents for the conclusion of the project contract within the deadline, or if he/she does not request extension of the set deadline in due time, or the deadline has not been extended, or other condition specified in the Decision is not met, the Decision shall expire on the date stated in the Decision. In this case it is not possible to conclude the project contract and the preparation of the project contract is terminated.

Withdrawal of the application by the applicant or termination of the project contract before the start of financing

The applicant is entitled to notify the SEF of the withdrawal of the application until the Minister's Decision is issued. If the Decision has already been taken or the project contract has been concluded, the applicant shall submit a **written proposal for**, on the basis on which, and after settlement of all obligations incurred so far, the project implementation will be terminated through IS AIS SEF.

Cancellation of contractual relationship

In the case when the contractual conditions are not fulfilled, the SEF may initiate the modification of the Contract on subject to a reduction or non-granting of entitlement to the remaining part of the support. If the termination of the contractual relationship is required by the project promoter, it shall submit a written application containing a termination request, and a justification for that request. The project contract may be cancelled **by agreement of both parties in written form**, if the law allows it.

In the case where the reimbursement has been started, the project promoter is obliged to return the support to the SEF. If the support is not repaid, within the 30 day period, the SEF will refer the case to the competent financial authority.

8.6. Settlement of dispute in the administration of applications or project implementation

During the *project implementation*, each project promoter is obliged to comply with the binding deadlines that must be respected and which also are settled in the legal act. If the project promoter is unable to meet the deadline due to objective reasons, it can send a request for extension, however, no later than within the deadline. If the project promoter does not fulfill the set obligations during the project implementation, SEF will proceed in accordance with the relevant provisions of Act No. 218/2000 Coll., On Budgetary Rules and Amendment to Certain Related Acts (Budgetary

Rules), as amended. Breach of obligations not exceeding a period of 30 calendar days will not be penalized and will not be considered a breach of the conditions for the provision of support.

You can send any questions to the Call during the whole time from the launch of the call to the end of the receipt applications to norwaygrants@sfzp.cz. We will reply you by email within 10 days.

Frequently asked questions will also be posted [here](#).

Suspicion of non-compliance with the principles of good governance in connection with the implementation of the Norway Grants may be submitted through the website of the National Focal Point of the Czech Republic, <https://www.eeagrants.cz/en/complaints>.
