Opening Statement by the Director of the Fund

I have to say that 2007 was a breaking point for the State Environmental Fund of the Czech Republic. In the first half of the year, thorough preparation for the implementation of the Operational Programme Environment, which elaborates on operational programmes from 2004–2006, was in progress. The Operational Programme Environment is the second largest as far as earmarked funds are concerned—EUR 5.2 billion, i.e. almost CZK 150 billion, is prepared for applicants.

Between 2007 and 2010, projects supported from the Operational Programme Environment (OP E) will be financed according to the n+3 rule. This means that funds allocated for 2007 can also be drawn in the following three years.

The Managing Authority of the OP E is the Ministry of the Environment of the Czech Republic. As such it is responsible for efficient and correct management of the programme and its implementation. The actual implementation is ensured by the Intermediate Body—the State Environmental Fund of the Czech Republic—that is responsible for collecting and evaluating applications and administering approved projects.

On 20 December 2007, EU Commissioner for Regional Development Danuta Hübner and the Czech Minister of the Environment, Martin Bursík, signed the programming document of the OP E at an Environment Council meeting.

The State Environmental Fund of the Czech Republic did not wait until the programme had been signed and announced the first call for projects on 29 June 2007. Before the end of 2007, two more calls were announced. This allowed the Fund to verify that it disposes of sufficient administrative resources and can build on its experience with the Operational Programme Infrastructure and other national and European programmes.

Over 16 years of its existence, the State Environmental Fund of the Czech Republic has significantly contributed to investments into nature conservation and environmental protection. I am well aware that none of that would be possible without the hard work of all our employees and co-workers. I would like to assure all of you that I appreciate your effort and I would like to use this opportunity to thank you and wish you a lot of success in the future.

Petr Štěpánek

CFO

Events and Accomplishments in 2007

In 2007, the State Environmental Fund of the Czech Republic (the SEF CR) greatly contributed to improving the environment in the Czech Republic, administering projects valued over CZK 3.7 billion that were financed from EU funds, the Cohesion Fund and the Operational Programme Infrastructure. From its own funds, the SEF CR sponsored projects aimed at a clean and healthy environment, totalling CZK 1.6 billion.

The most important event of 2007 was the commencement of the Operational Programme Environment.

The first year of the Operational Programme Environment

The first Call for applications within the Operational Programme Environment (OP E) was announced on 29 June 2007. The programming document was signed by the European Commission on 20 December 2007. The OP E is the second largest programme in the Czech Republic. For 2007–2013, EUR 5.2 billion from the Cohesion Fund and the European Regional Development Fund are available. In 2007, 1 288 applications were registered, amounting to CZK 21 billion.

Successful drawing from the Operational Programme Infrastructure

In 2007, the implementation of the Operational Programme Infrastructure (OP I) continued. EUR 171 451 084 was paid to applicants through the SEF CR, i.e. 89 % of the expenditure of all accepted projects.

Year	Paid to applicants (EUR)	Accepted projects (%)
2007	171 451 084	89
2006	109 188 902	56

Major projects drew most of the subsidy

In 2007, the drawing of funds for major projects reached its peak. From project approval to the end of 2007, nearly CZK 490 million was paid out, while the portion released subsidies in 2007 was nearly CZK 155 mil. (i.e. almost 32 %).

107 million to support households

From the National Programmes, in 2007, 1 876 projects were supported by nearly CZK 520 million, of which 1 768 different activities totalling 107 million went towards the installation of renewable sources in private residences.

The SEF CR was certified under ISO 14001:2004

The State Environmental Fund of the Czech Republic was certified under ISO 9001:2000 in 2006. In 2007, the ISO 14001:2004 Certificate was added. The integrated Quality and Environmental Management System was successfully introduced.

Information for potential applicants

We developed a new website for the Operational Programme Environment (www.opzp.cz) and a new website for the SEF CR www.sfzp.cz. Since September 2007, potential applicants have been able to call the toll-free Green Line at 800 260 500 and contact our on-line consultants dotazy@sfzp.cz.

For the Operational Programme Environment, we introduced a new intelligent information system consisting of the BENE-FILL (a resource designed for applicants) and SFZP-CENTRAL (an environment for administrators) applications. Communication between the Fund and the applicants/beneficiaries is mostly electronic, which reduces the administrative load on both sides and allows flexibility.

New people

In March 2007, Petr Štěpánek became the Fund Director (after František Krejčí). The organizational structure was changed: the newly created position of Deputy Director for IT Technologies went to Eduard Hlava, the Deputy Director for Project Preparation and Control is Leo Steiner and the Director's Office Manager is Zdeňka Klimková.

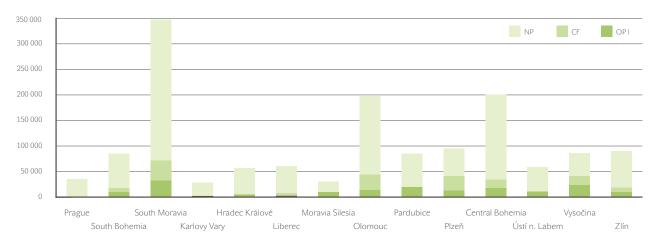

The modernisation and development of regional workplaces

In 2007, the Fund continued to develop its network of regional workplaces in order to provide better services to its applicants and beneficiaries, both personally and technically. The process of modernisation—moving into more modern offices—began. The very first new facility was the regional workplace in Zlín.

Applications received in 2007

The SEF CR Activities in 2007

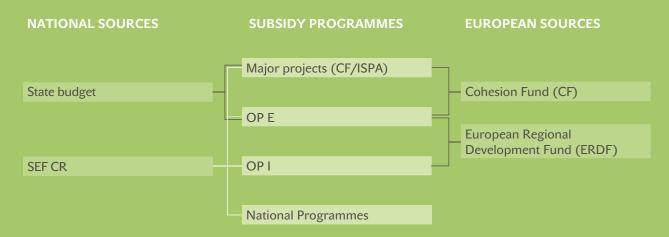

For 16 years, the State Environmental Fund of the Czech Republic has been fundamentally focused on contributing to the investments made in environment protection and improvement. Aid from the SEF CR is used mainly for water protection, air protection, the use of renewable sources of energy, waste management, nature and landscape conservation, and education. The Fund co-finances selected projects from national funds and from the European Funds, namely from the Cohesion Fund and the European Regional Development Fund.

The Fund provides direct financial aid (subsidies) and indirect financial aid (in the form of a loan or a contribution) to partial interest payments.

The Fund's main duties include consultancy and advice, admitting applications for aid and their assessment, preparing proposals for meetings of the Fund's Board and for the Minister's decisions, the contractual agenda for providing aid, the contractual collateralisation agenda for loans provided, releasing financial resources to beneficiaries, including the constant monitoring of the use of financial resources, the final evaluation of the utilisation of provided funds and achieved environmental effects, the monitoring of loan repayments until the final settlement of liabilities, and collecting receivables and imposing penalties for non-compliance with contractual terms and conditions for the provision of aid.

Subsidy programmes and sources of financing

The Operational Programme Environment

The objective of the Operational Programme Environment is to protect and improve the environment as a basic principle of sustainable development. To meet this objective, EUR 5.2 billion is available, i.e. 18.4 % of the aid from the European funds for the Czech Republic. For the 2007–2013 period, the Operational Programme Environment (OP E) is the second largest operational programme.

The Operational Programme Environment provides the Czech Republic with funds for aid in seven main areas:

Priority Axis 1-The Improvement of Water Management Infrastructure and the Reduction of Flood Risks

This is aid for projects to improve the quality of surface and underground water, to increase the quality of the drinking water supply, and reduce the risk of flooding.

Priority Axis 2—The Improvement of Air Quality and the Reduction of Emissions

This is aid for projects to improve or sustain air quality and reduce the emissions of basic pollutants into the air with a focus on the use of new, environmentally friendly technologies for generating electric energy, including renewable energy sources and energy savings.

Priority Axis 3—Sustainable Use of Energy Sources

This is aid for projects aimed at the sustainable use of energy sources, mainly for renewable resources and energy savings. The long-term objective is to increase the use of renewable energy sources for generating electric energy and heat and a more efficient utilisation of thermal waste.

Priority Axis 4-The Improvement of Waste Management and the Rehabilitation of Existing Ecological Burdens

This is aid for projects to improve waste management, especially for projects aimed at developing infrastructure for waste management, and projects focused on rehabiliting old ecological burdens.

Priority Axis 5-The Limiting of Industrial Pollution and Environmental Risks

This is aid in the form of subsidies for projects aimed at reducing industrial pollution and its related environmental hazards, with a focus on prevention and research in the field of pollutants and their monitoring.

Priority Axis 6—Improving the State of Nature and the Landscape

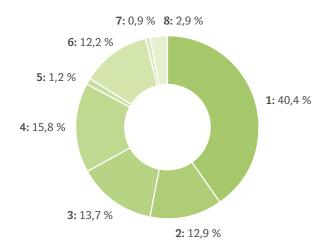

This is aid for projects to help sustain biodiversity, projects focused on protecting endangered species and ecological stability, and projects aimed at the establishment and conservation of natural features in developed areas.

Priority Axis 7—The Development of Infrastructure for Environmental Education, Consultancy and Awareness

This is aid for the formation of a large network of environmental education centres and information advisory centres focused on environmental protection in all regions of the Czech Republic and for the provision of appropriate professional materials on environmental education.

The projects within the Operational Programme Environment are funded from the European Regional Development Fund (ERDF) and from the Cohesion Fund (CF).

The share of priorities in the Operational Programme Environment

Priority Axis	Name	Support from the ERDF	Support from the CF
1:	The Improvement of Water Management Infrastructure and the Reduction of Flood Risks	_	EUR 2 billion
2:	The Improvement of Air Quality and the Reduction of Emissions	_	EUR 634 million
3:	Sustainable Use of Energy Sources	_	EUR 673 million
4:	The Improvement of Waste Management and the Rehabilitation of Existing Ecological Burdens	_	EUR 777 million
5:	The Limiting of Industrial Pollution and Environmental Risks	EUR 61 million	_
6:	Improving the State of Nature and the Landscape	EUR 599 million	_
7:	The Development of Infrastructure for Environmental Education, Consultancy and Awareness	EUR 42 million	_
8:	Technical Assistance		EUR 143 million

The Operational Programme Environment was signed on 20 December 2007. In 2007, 3 calls for applications were announced. The first call, of 29 June 2007, was aimed at water management projects and at projects to improve air quality and reduce emissions, on the sustainable use of energy sources, on improving waste management and rehabilitating old ecological burdens, and on developing infrastructure for environmental education and consultancy.

The second call (announced on 29 October 2007) provided an opportunity to apply for subsidies to fund projects aimed at nature and landscape conservation. The third call was announced on 21 December 2007, with the admission of applications pending in 2008. The applicants were allowed to submit projects for insulating schools and for water management. The applications submitted in 2007 were accepted during the following year.

Major projects funded from the ISPA/Cohesion Fund

Before its accession to the European Union, the Czech Republic had been offered the opportunity to draw funds from the Cohesion Fund through the ISPA (Instrument for Structural Policies for Pre-accession). On 1 May 2004, when the Czech Republic joined the EU, it became eligible to use subsidies from the Cohesion Fund (CF). The SEF CR was established as the implementation body for the environmental sector. Because none of the ISPA projects had been completed as of the date of the Czech Republic's accession, the previous ISPA projects have been considered CF projects (since 1 May 2004).

CF projects are focused on the area of environment and transportation. Applicants from the public sector (i.e. entities established for community services, funded mostly by the government, regional or local authorities or other public entities, or by subjects governed by those entities) may submit CR project applications, while the total costs of project implementation must not fall under EUR 10 million.

The priority for the major projects in the environmental sector is to comply with EEC legislation, especially in the area of water protection, waste management, air prevention and the rehabilitation of severely contaminated areas—old ecological burdens.

In 2007, aid provided from the Cohesion Fund to 19 major projects totalled CZK 2 621 701 000.

Co-financing major projects from SEF CR resources

As of 31 December 2007, the subsidies provided for these projects totalled CZK 489 812 000 (of which in 2007, CZK 154 991 000 was provided). For loans, it was CZK 58 934 000 (of which in 2007, CZK 7 329 000 was provided) from the SEF CR.

The SEF CR participated not only in the preparation and implementation phases of the ISPA and Cohesion Fund projects, but also in financing from SEF CR resources. 69 applications for aid from SEF CR resources were registered (yet in 2007, no applications were submitted). CZK 2 191 177 000 was provided from the SEF CR's own sources.

Between 1 January 2007 and 31 December 2007, 20 new approvals by the Minister were granted to co-fund ISPA/CF projects, totalling CZK 311 484 000. It was both the approved aid (subsidy) for the preparation of applications for aid from the CF and for the preparation of documentation for tendering procedures for investment projects implemented within the CF totalling CZK 35 405 000, and for the implementation of the CF investment project itself (subsidy, totalling CZK 90 934 000; and loan, totalling CZK 185 145 000).

Major projects financed from the ISPA/CF completed in 2007 (EUR)

Beneficiary	Project's name and place	Region	Total costs	EU support

The Operational Programme Infrastructure

The Operational Programme Infrastructure (OP I) is one of five operational programmes for the 2004–2006 period plus two years.

The global objective of the OP I is to protect and improve the environment and improve transport infrastructure. The Operational Programme Infrastructure is comprised of 4 priorities:

- Priority 1—Modernisation and Development of Transport Infrastructure of Nation-wide Importance (managed by the Ministry of Transportation) Modernisation and Development of Transport Infrastructure of Nation-wide Importance
- Priority 2—Reducing the Negative Environmental Impacts of Transport (managed by the Ministry of Transportation)
- Priority 3—Environmental infrastructure improvement (managed by the Ministry of Environment)
- Priority 4—Technical Assistance (a joint effort by the Ministry of Transportation, the Ministry of the Environment and the SEF CR)

The State Environmental Fund of the Czech Republic administers the implementation of Priority 3—Improving environmental infrastructure. Within the framework of Priority 3, 4 measures are implemented:

- Measure 3.1—Recovery of environmental functions of landscape
- Measure 3.2—Water management infrastructure improvement
- Measure 3.3—Air protection infrastructure improvement
- Measure 3.4—Waste management and rehabilitation of old ecological burdens

Calls for applications were announced in 2004–2006, while 2007 and 2008 were designated for completion of the projects. In 2007, additional approval was granted for aid to the Waste Water Treatment Plant in Týnec nad Sázavou. (The project was financed from the funds that for various reasons were not drawn by other projects.) The eligible expenses of the implementation of the WWTP project in Týnec nad Sázavou totalled CZK 111.6 million, while aid from the ERDF will total CZK 72.6 million; the SEF CR: CZK 16.7 million.

Drawing funds within the OP I

The total allocation for Priority 3 was EUR 193 483 171. As of 31 December 2007, 223 projects were approved, totalling EUR 206 425 808, which is 107 % of the total allocation for Priority 3. The difference between the funds allocated for the Priority and the funds for the approved projects is to be settled from national sources. 94 % of the approved projects signed supply contracts totalling EUR 193 259 434.

The State Environmental Fund of the Czech Republic participates in the funding of approved projects with ten percent of the base calculation of aid (i.e. eligible expenses). In addition, the Fund provides loans of up to 10 % of the base. The SEF CR funds provided CZK 532 million as of 31 December 2007.

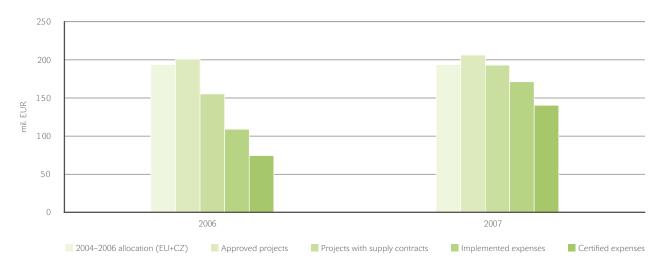

Provided from SEF CR financial resources (from the beginning of the programme until 30 November 2007):

Programme	CZK
3.1—Recovery of environmental functions of landscape	30 196 413
3.2—Water management infrastructure improvement	327 854 050
3.3—Air protection infrastructure improvement	81 639 994
3.4—Waste management and rehabilitation of old ecological burdens	92 350 642

Compared to 2006, there has been a rapid growth in the implementation and certification of costs. Applicants were granted EUR 171 451 084, which is 89 % of the costs of approved projects. From the funds, the European Commission paid (certified) to the Czech Republic EUR 140 365 589, which is 68 % of the costs of approved projects and 82 % of implemented costs. With the programme drawing to an end, the final stage of projects' implementation and the certification of the remaining expenses is anticipated.

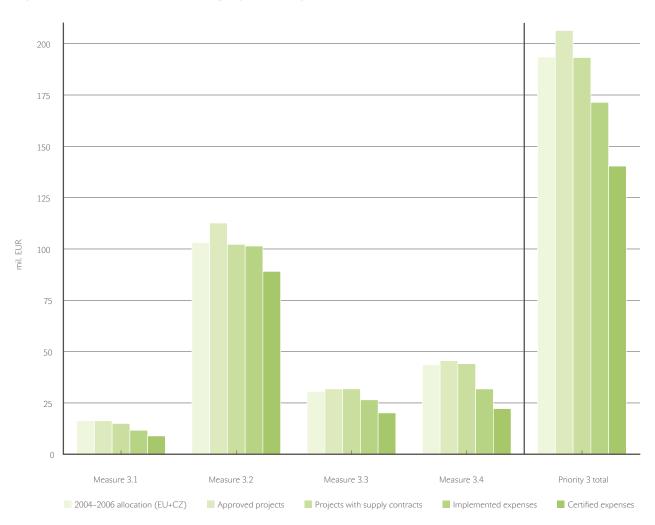

Regarding the total allocation of Priority 3, 89 % of the expenses were implemented and 73 % were certified. Compared to 2006, the increase in implemented expenses is 33 %, while the increase of certified costs is 34 %. Most implemented and certified costs go to Measure 3.2 (in 2006, due to an immense demand, EUR 14.4 million was relocated).

Allocation compared to approved projects, projects with supply contracts, and total amounts of implemented and certified expenses in Priority 3 (EUR million)—as of 31 December 2006 and 31 December 2007

The graph below shows the rate of approved projects, projects with supply contracts and the amount of implemented and certified costs in 2007 versus the total allocation of public funds (accumulated) for 2004–2006, for the Measures in Priority 3.

Allocation for the measures compared to approved projects, projects with supply contracts, and the total amount of implemented and certified costs in Priority 3 (EUR million)—as of 31 December 2007

The most significant projects financed from the OP I initiated in 2007

National Programmes

In 2007, the State Environmental Fund CR offered subsidies from national resources through the National Programmes. These programmes afforded an opportunity for projects that were not eligible for European funds.

In 2007, aid provided by the National Programmes was divided into the following areas::

- 1. Water protection,
- 2. Air protection.
- 3. Nature and landscape conservation,
- 4. Waste management,
- 8. Aid programmes for environmental education,
- 9. Non-investment aid for consultancy in the area of REACH.

(Programmes 5, 6 and 7, 10 and 11 were not announced in 2007.)

In addition, National Programme aid was used for the use of renewable sources. The objective was the implementation of a State programme in support of energy savings and the use of renewable energy sources for 2007. The aid was distributed in the following way:

- 1. A Investment support for environmentally friendly technologies for heating and water warming systems for flats and family houses, including the ecological generation of electric energy for private consumption:
 - a) Biomass boilers,
 - b) Solar systems for hot water supply,
 - c) Solar systems for heating and hot water supply,
 - d) Systems generating electric power.
- 2. A Investment aid for environmentally friendly systems for energy supply in municipalities and portions of municipalities.
- 3. A Investment aid for environmentally friendly heating and hot water supply systems in schools, medical and health care facilities and institutions providing social services and in regional and local authorities.
- $4.\ A$ Investment aid for heating flats and family houses with thermal pumps.
- 7. A Investment aid for ORC facilities—the interrelated generation of electric energy and heat from biomass and biogas.
- 8. A Investment aid to environmentally friendly technologies for heating and hot water supply in purpose-built facilities.
- 1. B Aid provided for education, promotion and consultancy within the national strategic campaign focused on supporting the utilisation of energy renewable sources.
- 2. B Aid for the publication of materials.

The National Programmes were designed for non-entrepreneurs and entrepreneurial entities (Programmes 2.A, 3.A, 7.A, 8.A and 2.B). Programmes 1.A and 4.A were aimed at individuals.

As of 31 December 2007, most of the registered applications were investment projects aimed at the use of renewable energy sources: 1 667 out of 1 739 all accepted applications, i.e. 95.9 %, of which 1 639 applications were submitted by individuals.

^{*} Applications approved in 2007 may have been registered in previous years.

Financial Report

General economic situation

The Fund ensured a continuous supply of financial resources for approved projects in accordance with Fund's internal regulations, including the defrayal of the operating expenses of the Fund's Office. The SEF CR meets the priority of the Czech Government and the Ministry of Finance, i.e. the co-financing of investments from European funds.

Of the total amount of funds earmarked to be granted, as of 31 December 2007, CZK 1 459.4 million was actually provided as financial aid in the form of transfers (of which: CZK 7.4 million was interest on commercial loans; CZK 155 million was ISPA/CF; and CZK 166 million was OP I), financial aid in the form of a loan: CZK 106.7 million (of which ISPA/CF was CZK 7.3 million; and CZK 24 million was OP I), totalling CZK 1.5661 billion.

Income

The Fund's income consists primarily of charges for pollution or damage to the specific segments of the environment, instalments of loans provided and the interest on such loans, as well as income from term-account deposits. Under the law, the Minister of the Environment decides on the usage of financial resources from the Fund on the basis of recommendations from a consulting body—the Fund's Board. This income is not included in the national budget of the Czech Republic.

The Fund's Income Structure—2007 budget (CZK million)

Budget Item	2007 Budget	Income as of 31 Dec 2007	Fulfilment %	Difference in CZK
Income from charges and fines by environmental comp	onents			
Waste water	352.0	401.0	113.9	49.0
Underground water	360.0	355.6	98.8	-4.4
Air	450.0	514.4	114.3	64.4
Waste	132.0	107.8	81.7	-24.2
Packaging	16.0	17.1	106.9	1.1
Nature	295.0	327.6	111.1	32.6
Fines and financial recourses	0.0	66.0	×	66.0
Total	1 605.0	1 789.5	111.5	184.5
Interest on deposits	25.0	64.3	257.2	39.3
Interest on loans	32.0	38.4	120.0	6.4
Loan repayments (without loan return)	646.0	638.1	98.8	-7.9
Income from financial settlement	0.0	63.0	×	63.0
Loan return (for previous years)	0.0	1.2	×	1.2
Other income	0.0	7.9	×	7.9
Sold and settled debts	0.0	0.0	×	0.0
SEF CR (total)	2 308.0	2 602.4	112.8	294.4

The Fund increased the value of financial resources by depositing them as term-account deposits with commercial financial institutions selected by the Fund's administrator. The total interest on term-account deposits and other revenues reached CZK 57.4 million and interest on current accounts reached CZK 6.9 million as of 31 December 2007. The resources acquired in this way were used to cover the expenses of running the Fund's Office.

The development of Fund's income in 1992–2007 (CZK million)

Year	Charges and other receipts	Loan instalments	Air Protection Programme	Total income
1992	2 422.50	0	0	2 422.50
1993	2 727.40	40.2	0	2 767.60

 $[\]mbox{\ensuremath{^{\star}}}$ The income for 2003 and 2005 excluding the MUFIS loan of CZK 500 million.

Expenses

Expense limits according to Government Resolution

Since the beginning of 2004, expense limits for the Fund have been determined. The binding volume of expenses approved by the Government for 2007 amounted to CZK 2 433.9 million.

The balance of the expense limit as of 31 December 2007 (CZK million):

Expense limit for 2007	Actual expenses in 2007	Difference
2 433.9	1 797.9	636.0

The expense limit was not drawn up as—in 2007—it was not possible to fund the projects covered by the Operational Programme Environment (the reason was that the PO E Programme Document was accepted by the European Commission in December 2007).

Actual expenses as of 31 December 2007—expenses by environmental component (CZK million)

	Transfers	Proportion %	Loan	Proportion %	Total expenses	Proportion %

Personnel Data

As of 31 December 2007, 205 people were employed by the SEF CR. The increase (in comparison to end of 2006, 114 employees) follows the agenda extended by the administration of the Operational Programme Environment.

In 2007, the average gross monthly salary per SEF CR employee was CZK 29 299.

The Board

The Board of the State Environmental Fund CR is a consultancy body of the Minister of the Environment. The purpose of the Board is to discuss important issues on the creation and utilisation of financial resources of the Fund. The Members of the Board and its Chair are appointed and discharged by the Minister of the Environment. In 2007, five meetings were held.

The Chair of the SEF CR Board:

Václav Mencl Deputy, Vice-chairman of the Environmental Committee, The Chamber of Deputies of the Parliament of the Czech Republic

The Members of the Fund's Board:

Libor Ambrozek Deputy, Chairman of the Environmental Committee, The Chamber of Deputies of the Czech Parliament

Ivo Bárek Senator, Chairman of the Regional Development, Public administrative and Environment Committee, The Senate of the Czech

Parliament

Petr Bendl President of the Central Bohemia Region

Rut Bízková Deputy Minister, Director of the Department of Environmental Economy and Policy, the Ministry of the Environment of the

Czech Republic

Pavel Činčera Director of the Government Council for NGOs, the Office of the Government of the Czech Republic

Jiří Hodač Deputy Minister, the Department of Investments and Transport Infrastructure, the Ministry of Transportation of the Czech

Republic

Josef Ježek Deputy, The Regional Development and Public Administration Committee, The Chamber of Deputies of the Czech Parliament

Dan Jiránek Mayor in Kladno and Chairman of the Environmental Committee, the Union of Towns and Municipalities

Jiří Krátký Deputy, The Regional Development and Public Administration Committee, The Chamber of Deputies of the Czech Parliament

Ladislav Mlčák Deputy, Vice-chairman of the Environmental Committee, The Chamber of Deputies of the Czech Parliament

Miloslav Müller Director of Minister's Office, the Ministry of Finance of the Czech Republic

Ludmila Müllerová Senator, Vice-chair of the Regional Development, Public Administration and Environment Committee, The Senate of the Czech

Parliamen

Zuzana Peterková the Department of General and Communal Hygiene, the Ministry of Health of the Czech Republic

Jana Příhodová The Czech Trade Inspection

Přemysl Rabas Deputy, the Environmental Committee, The Chamber of Deputies of the Czech Parliament

Ladislav Šincl Deputy, the Environmental Committee, The Chamber of Deputies of the Czech Parliament

Jiří Trnka Director of the Department of Environmental Strategy and RES, the Ministry of Agriculture of the Czech Republic

Jiří Vačkář Deputy Minister, the Section of Regional Policy and Tourism, the Ministry of Regional Development of the Czech Republic

Provision of Information

Pursuant to Act No. 106/1999 Coll., on free access to information

The Annual Report of the State Environmental Fund of the Czech Republic concerning the activities for the provision of information has been disclosed pursuant to Article 18 (1) Act No. 106/1999 Coll., on free access to information, and in compliance with Government Resolution No. 875/2000 of 6 September 2000, on the methodical guideline for the unification of public administration body procedures in ensuring the rights of individuals and legal entities to access information under Act No. 106/1999 Coll., on free access to information

In 2007, the Fund processed 0 requests for information under Act No. 106/1999 Coll.

Information requested pursuant to Act No. 106/1999 Coll.

- The number of requests for information: 0
- The number of rejections: 0
- The number of appeals: 0
- A transcript of substantial parts of each judgement concerning a compulsory judicial review of rejected requests on providing information and a summary of the expenditures incurred to the subject in relation with proceedings at law rights and duties in compliance with the Act specified above, including the expenses of the employees and expenses of legal aid: 0
- List of exclusive licences provided, including reasoning: 0
- The number of complaints delivered, in compliance with Article 16a: 0

Other related information

Every month, the SEF CR processes dozens of inquiries—questions asked by potential applicants (individuals and legal entities). The questions are not considered information requested pursuant to Act 106/1999 Coll. The questions are answered by the State Environmental Fund of the Czech Republic free of charge.

The inquiries were mostly related to:

- The conditions for receiving aid for environmentally friendly technologies of heating and hot water supply systems for flats and private residences (for individuals) and heating for flats and private residences with thermal pumps (for individuals);
- The number of projects granted aid within the National Programmes and EU funds, and amounts of the aid provided;
- The conditions for receiving subsidies from the Operational Programme Environment;
- The implementation and results of specific projects.

For ensuring top quality and promptness while providing information, the State Environmental Fund of the Czech Republic established a Green Line for potential applicants (from September 2007). Qualified employees assist applicants in resolving confusion related to compiling and filing applications over the phone or by e-mail. The most important types of inquiries and replies provided by the Green Line Assistants are available at www.opzp.cz (Frequently Asked Questions, FAQ). Other replies to frequent questions related to the SEF CR's activities are published at www.sfzp.cz.

Auditor's Report

The subject-matter and purpose of the audit:

The 2007 annual statement of finances based on the provisions of Act No. 254/2000 Coll., on auditors, and in compliance with the International Standards on Auditing and related application principles issued by the Chamber of Auditors of the Czech Republic.

Auditor's Report

In our opinion, the financial statement provides a true and correct picture of the assets, liabilities, equity and financial situation of the State Environmental Fund of the Czech Republic as of 31 December 2007 and is in compliance with laws and accounting standards applicable in the Czech Republic.

It can be certified that the state of accounts truly reflects the reported assets and liabilities of the State Environmental Fund of the Czech Republic as of 31 December 2007 in all major aspects and is in compliance with laws and accounting standards applicable in the Czech Republic.

The auditor's opinion of the audited accounting unit can be issued without reservations.

Ing. Pavla C is a rová, CSc.

The audit was performed by Diligens in Prague, on 8 April 2008.

Auditorská licence č. 196
